

IN THE ABSTRACT:

Please amend the Abstract as follows:

ALG
~~The embodiments of the present invention are a method of~~ Methods and systems are
provided for reconciling any changes that have occurred in two file trees since they were last
synchronized. ~~According to one embodiment, the~~ A reconciler takes as input two logs of ~~said the~~
changes made in the respective file trees. ~~In another embodiment, the~~ The first log resides on a
client computing device, and the second log resides on a server computing device. ~~According to~~
~~another embodiment, the~~ The reconciler outputs two sets of changes that need to be applied to
the respective file trees in order to synchronize them. ~~According to another embodiment, the~~
The reconciler detects and outputs a list of changes that conflict with each other.
